

## THANKS GIVING

*When we hear the words 'community helpers,' we think of all the people who help us in our daily activities. A community helper can be defined as any person who helps us with our overall well being.*

*To teach our children to appreciate community helpers, we at AECs MMPS celebrated "Community helper week". The best way to learn more about community helpers is to see them in action. Going out to visit them and having them visit you is a wonderful way to expose children to the theme.*

*In the month of February the kindergarten students celebrated "Thanks Giving" week by giving a small token of appreciation in the form of chocolates/sweets and handmade cards to some of the school staff who help us. They were taken to visit the Gardner, Security personnel and Administration department to explain about their roles, duties and the kind of service that they provide. All the children thanked them by giving them sweets and chocolates.*

*The parents played an important part in helping the students make cards from the things easily available at their house to make them understand the concept of 'Best out of Waste', for their teachers to show gratitude and respect for moulding them and teaching them to grow as good individuals.*

*This activity truly brought out the essence of the theme and helped children understand the role of all the community helpers who help us in our daily lives.*

*The activity was concluded by the students visiting our Director Madam, Dr. Seema Goel and thanking her for being an integral part of the school that teaches them about various aspects of our surroundings and society.*
